Secret Fixings

Timber offers you the most beautiful feel to match your lifestyle and the warm ambience for you to enjoy.

Deck-Max hardwoods offer you a cross section of colours, species and decking sizes.

Bring the outside into your home by selecting one of our Select Grade timbers with a secret fixing system that is number one in the world.

Decking Choices

Iron Bark

one of Australia's finest timber

- Design Tip is to create picture frame detail.
- Using the secret fixing your deck will be spectacular.
- Using the natural colour tones of Iron Bark along with its durability – this is premium decking at its best.

Spotted Gum

one of Australia's finest

- Colour tones only nature can create.
- Variety of colours from light brown to chocolate and streaky in the veins.
- Select Grade materials for your project.
- Always ensure good air flow under the decking area and often set with a 5mm gap.

Merbau

one of australia's favourite timbers

- Referenced by merbau / merboo / kwilla – it is by far the most popular timber selected in Australia.
- Deck-Max manufacture in 135mm wide boards, this is the most beautiful timber for our outdoor lifestyle.

Merbau

one of australia's favourite timbers

- Merbau has a very straight grain and allows the board to be milled in a wider dimension (135mm) This timber will retain great stability.
- It is all in the drying of hardwoods that we can achieve stability and quality.
- Natural colour in the oil coating is recommended to retain the beautiful colours and grain of this timber.

Forest Light

one of Australia's finest timbers

- More often referred to as Blonde timber for its light to pale straw colours.
- Ideal for the soft feel and light tones.
- The final oil you choose will determine the finished colour.
- Ask Deck-Max for suggestions in coatings and design.

Best Practice Tips

- When choosing the area for the decking always consider the clearance off the natural ground to the decking.
- This ensures that air flow and moisture are controlled.
- Be sure you have achieved good drainage from under the deck area.
- Ask Deck-Max for further detailed information during your planning.
- Consider the gap settings between the boards – Deck-Max offer 2 x settings 3mm and 5mm.
 - 3mm is the building code minimum allowing for expansion and contraction.
 - 5mm is selected for fire areas and decks close to ground.
- The wide Aussie Hardwood in the wide board say 140mm is not stable and we do not recommend this dimension for decking – warping and twisting may occur. 90mm is Stable by dimension.
- Deck-Max is the only company in the world that provides to you End Matched decking – ask for more information....
 - All Deck-Max timber is grooved both sides and grooved both ends
 - You do not have to cut and join on a joist with this end match decking
- Fast Fixing up to 30% faster to install
- End Match decking is up to 60% less waste
- Hardwood Versus Composite?
 - This is the hottest topic in the industry today, Deck-Max is the only company that will provide technical, and design advise on both along with product for your project in both materials to assist in your decision.
 - We offer Zhu Composite in a variety of colours and textures with a 25 year manufacturers warranty.
- Coatings for hardwood
 - This is a hot topic as well and after many years of understanding that the market has many choices and opinions.
 - We here at Deck-Max will always revert to best practice for coatings and cleaning of the natural hardwood.
 - Please ask us for the best practice and longevity.

Note: Decks close to the ground or over concrete - You should consider all of our options to see what is best suited for the environment that you are installing the decking.

Deck-Max Architectural

The Market Leaders in Decking

“are you confused by others? .. Ask an Expert”

- Australian owned company who manufactures here in Australia from selected logs to finished product.
- Deck-Max is the expert in decking with over 60 years combined industry knowledge. We provide technical support to industry associations.
- Has a patent protected profile to provide you with the strongest fixing in the world.
- 6 times stronger than nails / screws
- What is End Matching?
- It provides a groove in the end of the board so you can join between joists with a deflective strength in excess 500kg.
- Eliminated nails and screws from the surface of your deck.
- Legally sourced timber - Certified legal wood with Chain of Custody as an environmentally aware company. (Note: Deck-Max will only supply legal timber.)

- Timber is kiln dried to the perfect moisture content to be sure the decking will not cup and twist and minimises the tannins / resins in the timber.
- Important Note: we take our timber to Core moisture and not just surface moisture this takes a lot longer to produce however it ensures the quality & stability of the wood. We are the only company that manufactures its decking from log to finished product.
- The difference from Deck-Max to others is we control all facets of the process to ensure the highest quality material is produced from ONLY LEGAL WOOD sources.
- Legal wood preserves the resource for future generations.

Deck-Max Hardwood Decking

Overview

- Timber offers a warm and natural beauty.
- Deck-Max is a manufacturer of timber - structured as a vertically integrated business (from Log to finished product).
- The only decking supplier that manufactures this highly quality decking as Select grade.
- Pre grooved for secret fixing.
- All decking is end matched.
- Deck-Max produces many Aussie Hardwoods and Merbau.
- The only timber decking company that offers a 5 year satisfaction guarantee.
- The only company that offers Life Time warranty on the fixing clips.

Pros:

- Deck-Max hardwood is very carefully processed to ensure maximum performance and stability.
- Deck-Max decking (Patent Protected) is the only company in the market that end matches the decking this allows you to join between joists saving up to 70% in waste.
- Very fast to install (you do not have to measure and cut every piece of decking).
- 50% less fixings
- Decking will not crack and split as it has no nails & screws.
- Hardwood can be refurbished at any time especially with no nails or screws on the surface.
- Clips are warranted for Life.
- No butt joint gap is required.
- Life span is generally 40 + years.
- Nothing replaces the colour or feel of natural timber.
- With secret fixings the reality of maintenance is 1 to 2 hours every year.
- Perfectly suited for the rigours of the Australian climate

Cons:

- Will be a little more expensive than composite.
- When exposed to the elements you will require re coating every 12 to 18 months.

The Market Leaders in Decking

“are you confused by others? .. Ask an Expert”

ZHU composite is:

Fully Protected on all sides - Double Capped - wraps over all sides included in the groove.

- Secret Fixings - no nails or screws in the surface
- Solid core construction - Very strong
- Dual Texture (wood grain and contemporary) in the surface of the decking boards.

Material Construction:

Core - Solid core (middle of the board) uses hardwood fibres for greater strength and durability. The core is made from 90% recycled Material. Hardwood fibre H.D.P.E.

Shield - The Shield (capping of the outside of the board) is a patented formula of H.D.P.E. provides colour paten and deep wood texture creating the warm and beautiful look of wood.

What is the difference from ZHU to other composite decking:

- As They Say "composites are not composites"
- Zhu supplies High Quality at affordable prices
- Zhu is double capped where many others are not capped with HDPE
- Other composites expands a lot in the length (*called Tangental expansion*)
- Read the warranties and disclaimers to see what others do not cover in the warranty
- Ask them how long they have been in business

Capped Composite Decking

Overview

- Composite Decking contains recycled plastics and hardwood material (up to 90%) along with UV inhibitors for colour stability, colour additives and Biocides.
- Zhu Composites are co-extruded, the board has a durable composite SOLID core construction bonding the capping to the core material resisting decay, fading and staining.
- 25 year domestic warranty.

Pros:

- New generation technology has created the visual look and feel of natural wood.
- Available in the latest colour tones.
- Perfect when deck is close to ground
- Never needs sanding or re sealing.
- Average life span is 25 + years.
- Will not crack, splinter, warp or suffer from insect infestation.
- Installed with secret fixings avoiding the surface fix with nails or screws.
- Simply clean with soft detergent.
- Anti fungal material.
- Costs are similar to hardwood.
- Slip rating of R10 (meets commercial standards).
- 25 year manufacturers warranty.

Cons:

- Colour tones can never duplicate natural timber.
- Joist centres are closer than hardwood - 350mm >> 400mm.
- Gaps are required between butt joints to allow for tangential expansion. (see the image to the right)
- Will fade a little over the 20 year life of the deck when fully exposed to the weather.
- The information in the market place is very confusing and our task is to explain the facts.

“The Market Leaders in Decking”

Composite Decking and Screens

Secret Fixings

Composite - Pages 14 to 22

Composite decking was introduced to the Deck-Max product range many years ago understanding the market needs and we are now the only company specialising in both hardwood and composite and bamboo.

What to ask Deck-Max before you start...

Is your composite decking double capped

Have you researched your project

Do you have your council approvals

Can Deck-Max help in the design

Has your contractor installed composite before

Do you have references from your builders previous customers

Starter Clip - set along the joists then set your first board to it.

Clip and screw for fixing boards to sub frame - sets a 6mm gap.

Gap setting tool - 3mm / 4mm / 5mm / 6mm

- Tips for installation:**
- Set Joists @maximum 400mm centres
 - Minimum joist width 45mm
 - See Joist and board layout
 - Allow 15mm to 20mm when boards are fixed within a wall to wall situation
 - Set minimum gap between the ends of 4mm, use the setting tool.
 - Fix clip and screw at every point that the board intersects with joist sub frame.
 - Do not over fix the screw into the clip
 - When using the starter clip be sure to set straight line as this is the first board and is your straight edge to pull to.
 - Use the Deck-Max Decking clamps during the assembly of the boards. Cut board just like timber standard tools used.

Introduction

DassoXTR is a solid, high density bamboo board, made from compressed bamboo strips, it is suitable for outdoor applications, especially as decking. Dasso uses a special, patented heat treatment process to alter the hardness, dimensional stability and durability to a level superior to the best tropical hardwood species. As for the surface view, the special symmetrical shape of the faces it offers possibility to select with smooth face or grooved face. Either way the fixing clip suits both options. Like any untreated tropical hardwood, when exposed to the outdoor elements, DassoXTR will turn grey over time creating a very natural look.

The Worlds Greenest Material

Bamboo Decking

Deck-Max are the market leaders in innovation, quality and service. This bamboo product has been proven in over 30 countries installing over 60 million sq.m. of the material around the world from domestic back yards to Major commercial projects. DassoXTR products used worldwide by these companies and many more.

Gradation of graying of dassoxtr over time

- DassoXTR can be left to silver off in colour to wash away dirt away simply use a reviver to clean off dirt and grime.
- Depending on the exposure to UV the time to grey off varies.
- Very easy to refurbish > Clean and > re oil to bring that original colour.
- The surface will weather like hardwood overtime and slightly more texture - can be sanded to refurbish as well.

Important Note: Fading colour depends on the exposure of the sun varies from silver grey to tan.

Important Note: Always follow the maintenance program - seek our advise at any time.

Important Note: Bamboo is a natural material and is a GRASS - as a natural material it will have similar characteristics as wood.

Important Note: Depending on the exposure the decking will silver off like the image on page 24 (top right).

Spotted Gum - Epic

XTR Mahogany

Appearance and Colour

- DassoXTR is a natural product, which can vary in colour, grain and appearance. Colour will change over time depending on the maintenance schedule. The boards have a brown to dark brown colour when installed, which turns into a lighter colour several weeks after installation. Without further maintenance the colour gets greyish relatively fast (similar to most other wood species). If a brown colour is preferred, maintenance should be done with our recommended coatings.

Important Note: You must follow the coating instructions from the manufacturer.
